

CUSTOM KISS
PRINTABLE TEMPLATE

BEST PRACTICES

- 1. Apply a high-contrast lip color. The print looks best with a **matte** or **drier-finish** lip product — do not use anything too glossy or wet.
- 2. Kiss a blank white piece of paper. The more defined the print, the better; images that are too light will not stitch out well.
- 3. Scan or take a photo of your kiss print with **even lighting and angle**.
- 4. **Crop the image tightly around design.** Failure to do so may result in a poor embroidery result.
- 5. Upload cropped image to our website. We’re so excited to see what you create!
